

PEDDINGHAUS

NEW in our product range and in our OFFENSIVE CAMPAIGN 2020, the Peddinghaus small sledge hammer PROTECT with metal protection sleeve and hickory handle!

The small sledge hammer with metal protection sleeve is the perfect hammer for the craftsman. The forged head according to DIN 6475 convinces with proven Peddinghaus quality.

Made of quality steel of grade C45.
- drop forged and polished - carefully hardened and tempered - rust-proof thanks to powder coating.

It is handcrafted with a clean finish proper edge break. The hickory handle lies well and balanced in the hand.

The metal protection sleeve protects the handle from impact. This prevents the handles from breaking and guarantees a long service life.

Available in three sizes:
1,000g / 1,250g / 1,500g. according to DIN 6475

The Peddinghaus small sledge hammer ULTRATEC is another model in our extensive Hammer range.

Its unbreakable 3-component handle ULTRATEC is securely glued and permanently attached to the hammer head using special adhesive. The fibreglass core is covered by an ergonomically shaped carrier layer made of polypropylene, which absorbs vibrations - for fatigue-free working. The grip layer made of elastomer makes it non-slip, ergonomic and durable.

Available in four sizes:
1,000g / 1,250g / 1,500g / 2,000g - according to DIN 1041

Officially available in summer 2020 - the small sledge hammer NANOVIB® Peddinghaus by Leborgne. Thanks to the patented nanovib® handle, the hammer absorbs 45% of vibrations, thereby reducing the risk of occupation-specific concomitant diseases. Nanovib® the new and professional solution to avoid work-strain on the construction site.

Quality made in France!
